ABOUT US

UPM Raflatac is part of UPM, a leading forest industry company based in Finland. UPM delivers renewable and responsible solutions and innovates for a future beyond fossils across six business areas: UPM Fibres, UPM Energy, UPM Raflatac, UPM Specialty Papers, UPM Communication Papers and UPM Plywood. As the industry leader in responsibility, UPM is committed to the UN Business Ambition for 1.5°C and the science-based targets to mitigate climate change. EcoVadis has recognised UPM with a platinum score based on the company's sustainability performance in the categories Environment, Labour and human rights, Ethics and Sustainable procurement.

At UPM Raflatac, we develop innovative and sustainable labeling solutions, exquisite film laminates for Graphics Solutions and removable paper-based self-adhesive products. At our factory in Hagenow, Germany, we produce a large variety of sticky notes and related self-adhesive, paper-based products under Global Notes by UPM Raflatac. We are one of the largest internationally operating manufacturers of sticky notes with more than 30 years of experience and long-standing customers on all continents.

UPM NOTES

We are passionate about paper-based products and continually work on new solutions for our customers. There is a growing need to replace fossil-based packaging materials by renewable packaging solutions. At the same time, the packaging for consumer goods needs to be self-explanatory and allow the consumer to identify the content easily.

With our UPM Notes assortment, we have added a range of high-quality sticky notes packed in FSC™-certified (FSC C003094) paper to our portfolio. The recyclable paper offers a more sustainable alternative to the standard plastic packaging of sticky notes and is more than 80% lighter than cardboard packaging. Its transparency allows the consumer to see the content of the packaging.

Our UPM Notes and their paper packaging have officially been certified as recyclable by Papiertechnische Stiftung (PTS). The recyclability has been tested according to the "Cepi Recyclability Laboratory Test Method V2". Thus, our sticky notes and their innovative paper wrapping can easily be disposed of in the paper bin.

All sticky notes are made from FSC™-certified paper and a water-based microsphere adhesive with double the adhesion compared to standard sticky notes. The UPM Notes range consists of 20 colourful products – made in Germany.

FSC™ CERTIFICATION

All of our paper-based Global Notes by UPM Raflatac are made from FSC™-certified paper (FSC C003094). The Forest Stewardship Council™ (FSC) defines sustainable forest management standards that are based on agreed principles and supported by environmental, social, and economic stakeholders.

FSC certification means that:

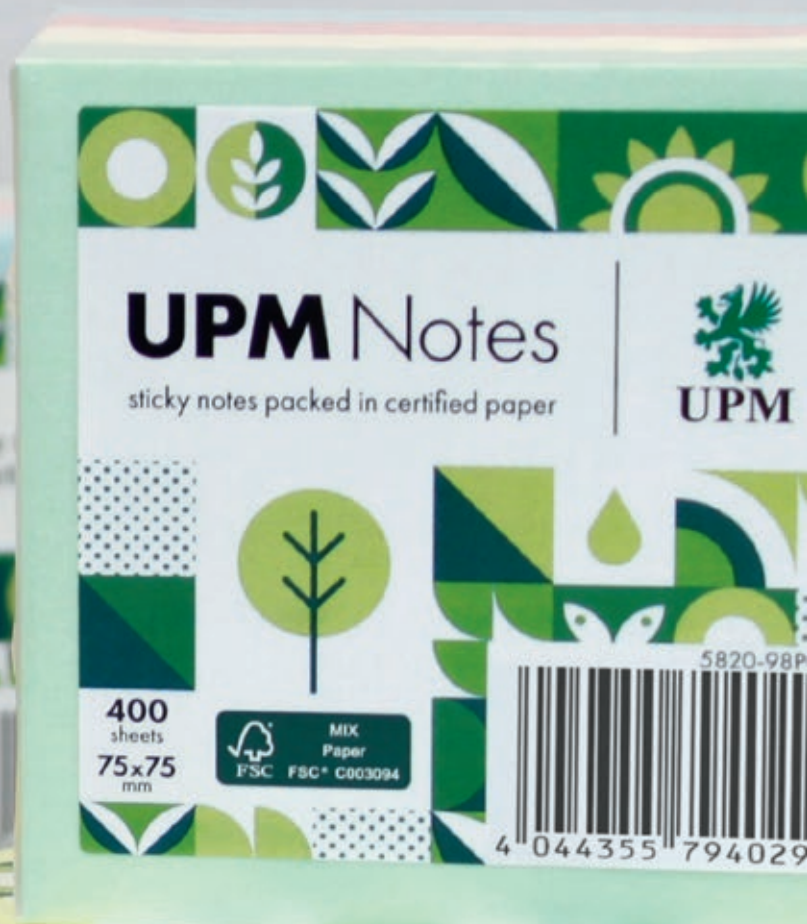

- The FSC-certified material is traced and credibly used in accordance with the FSC's chain of custody requirements.
- By choosing our FSC-certified sticky notes, you support responsible forest management.

SOLVENT-FREE ADHESIVES

All our UPM Notes are coated with a solvent-free adhesive that offers double the adhesion compared to standard sticky notes. Solvent-free adhesives use less energy and other resources during manufacturing compared to solvent adhesives. They are also free from hazardous air pollutants which pose a risk to human health and the environment. Our solvent-free adhesives are continually tested in our own laboratory to create sticky notes with optimal adhesion.

UPM NOTES

Eliminate the use of unnecessary plastics by choosing the UPM Notes assortment packed in FSC™-certified (FSC C003094) paper.

- Transparent paper packaging for good product visibility
- Solvent-free adhesive with double the adhesion compared to standard sticky notes
- Removable and repositionable without residue
- FSC™-certified
- Recyclable (tested acc. Cepi Recyclability Laboratory Test Method V2)
- Made in Germany
